(54) SHADING CAR FILM STUCK ON GLASS SURFACE OF VEHICLE

(57)Abstract:

PURPOSE: To provide a shading car film, by which at the time of sticking a shading car film on a window glass or the like of an automobile, sticking finishing equivalent to professional handwork can be achieved simply and in a short time even by a quite amateur user.

CONSTITUTION: A shading car film comprises a car film main body 1 which is formed out of a plastic resin film and a thickness about 17μ to 100μ , an adhesive agent surface 1a applied to the whole of the back for sticking the car film main body 1 on the glass surface of an automobile, and a plastic resin film about 17μ to 100μ thick. Accordingly, in order to protect the adhesive agent surface 1a, a releasing film 2 is joined to the surface in such a manner as to be released, and further many air (bubble) vent holes H formed in such a manner as to pass from the surface of the color film main body 1 through the back thereof to the interior of the releasing film 2 are provided at designated spaces.
